

11-Month Implant Training Program

What We Do: The 11-Month Implant Training Program Difference

Simply put our mission is twofold: to educate and to inspire. Education comes naturally to us. We are a group of dedicated professors and clinicians. Combined we have decades of teaching and hands-on experience and we know how to connect with our students in meaningful ways. No question is out of bounds. And no question will be ignored.

Of course, many teachers can say that. What sets us apart is our ability to inspire. Take the time to speak to our former students or read/watch their video testimonials and you will hear firsthand the passion in their words. We are in the business of transforming lives.

Session 1 - February 8-9, 2020:

Day 1 and 2 - Dr. Maria Pilar on Treatment Planning

Session 6 - July 18-19, 2020:

Day 1 and 2 - Dr. Jeanette Simonpietri Soft Tissue with Pig Jaw workshop

We do this by empowering you with knowledge and confidence in what you do.

Confidence isn't about a proverbial pat on the back. And it isn't about "job well done." It's about knowing deep down that you possess the skills to perform basic, intermediate, and complex dental implant cases. It's about having the practice management skills to motivate your staff and excite your patients.

It's about doubling or even tripling your practice revenue and the number of patients you treat in only 11 months!

Session 7 - August 15-16, 2020:

Day 1 and 2 - Drs. Maria Pilar and Luis Bittar with Cadaver Lab

Session 8 - September 12-13, 2020:
